A LETTER OF APPRECIATION

Dear Students & Staff,

I express my heartfelt gratitude to all the students and staff of the College for extending unprecedented support and coordination, directly or indirectly, in making the celebration of **“World Earth Day-2024”** a grand success. The handholding support and training given to the students to develop practical skill in manoeuvring & watering of plants, provisioning of food plaza, managing drinking water points, shower points for birds & bees & making campus plastic free, hosting ORS Points for students and staff as the mercury on rise, was exceptional and praiseworthy.

The presentations made by the student speakers on the topic **“Planet Vs Plastic”** were exceptionally brilliant. The message of which reached all over the country and response was positive. **The novelty of the programme was active involvement/ participation of students and teachers of all streams and the element of manual work in the programme.**

I appreciate the students and staff for their collective efforts and enthusiasm for creation of a greener, cleaner, healthier and safer environment in the College campus.

I with this of the commitment of the students and staff will soon percolate beyond a single day observation and become their lifelong practice and celebration.

I wish you all a Healthy Life in a Healthy Planet.

BETTER ENVIRONMENT, BETTER TOMORROW
